

AVANTI TAGDE

Maharashtra, India | +91 7972463473 | avantikacybersec@gmail.com | github.com/avantikacybersec-creator

SUMMARY

Backend Developer with internship experience in Java and Spring Boot, building secure REST APIs, authentication systems, cloud integrations, and database-driven applications. Developed multiple production-style backend systems including content management, task management, online examination, and AI-powered speech-to-text applications.

TECHNICAL SKILLS

Languages: Java

Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate

Backend: REST APIs, JWT Authentication, RBAC, DTO Pattern, Pagination, Exception Handling

Databases: MySQL, PostgreSQL, Query Optimization, Indexing, Schema Design

Tools: Git, Maven, Postman, Swagger, Cloudinary, Deepgram API

EXPERIENCE

Backend Developer Intern

2026 – Present

Labmentix

- Developed a Speech-to-Text application using Java, Spring Boot, PostgreSQL, Deepgram API, and Cloudinary.
Backend: github.com/avantikacybersec-creator/speech-to-text-app
Frontend: github.com/avantikacybersec-creator/speech-to-text-frontend
- Built REST APIs for user registration, authentication, audio upload, transcript history retrieval, and transcript deletion.
- Implemented BCrypt password encryption, validation, and centralized exception handling.
- Integrated Deepgram Speech-to-Text API for audio transcription and Cloudinary for cloud-based audio storage and retrieval.

Backend Developer Intern

Jan 2023 – Jul 2023

NLT Infotech Pvt. Ltd., Nagpur

- Delivered 10+ production REST APIs for a multi-role Online Examination Portal covering exam scheduling, user management, and result processing.
- Improved SQL query performance on multi-table joins through targeted indexing and optimization, resolving key bottlenecks flagged during internal QA.
- Implemented centralized exception handling and input validation, reducing API error rate to near-zero.

PROJECTS

Speech-to-Text Application | Spring Boot, PostgreSQL, Deepgram API, Cloudinary

- Built an end-to-end audio transcription platform with cloud storage, transcript history, authentication, and validation.
- Integrated Deepgram API for speech recognition and Cloudinary for audio file management.

Secure Content Management API | Spring Boot, JWT, Spring Security, MySQL

- Developed 10+ REST APIs secured with JWT authentication and RBAC (Admin/User roles).
- Implemented server-side pagination, keyword search, database indexing, and centralized exception handling.

Task Management System | Spring Boot, JWT, MySQL

- Built a 3-role backend (Admin/Manager/User) with JWT authentication and global exception handling.
- Applied DTO pattern to decouple API contract from database schema.

Semantic Search Over Encrypted Data | *Java, Cryptography*

- Implemented MWTC algorithm for privacy-preserving keyword search over AES-encrypted datasets without exposing plaintext.

EDUCATION

M.Tech – Cyber Security	<i>Jan 2024 – Jul 2025 Deferred</i>
University of New South Wales, Australia	
B.Sc. Computer Science	<i>2020 – 2023</i>
G H Rasoni University, Maharashtra CGPA: 8.11/10
